Profile

Experienced Web Developer with a strong background in full-stack development, specializing in React.js, PHP (CodeIgniter, Laravel), and PostgreSQL. Proficient in building scalable and high-performance applications, implementing RESTful APIs, and optimizing UI/UX consistency.

Currently working at Krawma & Associates Co., Ltd., I contribute to the development and enhancement of the BongThom platform, focusing on API integration, frontend improvements, and system performance optimization. I actively participate in Agile (Scrum) development, collaborating with cross-functional teams to deliver high-quality software solutions.

Employment History

Web Developer. at Krawma & Associates Co., Ltd., Phnom Penh

AUGUST 2022 – PRESENT

- Responsible for creating new features and services for the BongThom website backend, frontend, and mobile app.
- Implemented APIs for CV registration gateway and other features to improve platform functionality.
- Conducted thorough testing and maintenance to fix bugs and improve system stability.
- Designed and developed a reusable UI library to improve consistency and efficiency across the BongThom backend and frontend applications.
- Presented key deliverables in sprint planning meetings by demoing user stories and finished features to the Product Owner, facilitating informed decision-making.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospective meetings.
- Researched and implemented new technologies to enhance system performance and maintainability.

Web Developer at ALLWEB Co., Ltd., Phnom Penh

JANUARY 2019 – 2022

- Developed and maintained efficient PHP applications, reducing system errors.
- Debugged existing systems, enhancing overall software stability.
- Analyzed client specifications to implement technical solutions aligned with business objectives.
- Reviewed code to ensure adherence to best practices and coding standards.
- Authored comprehensive test cases, improving software quality assurance processes.
- Collaborated with international teams across Cambodia, France, and Vietnam to deliver cohesive projects.

IOS Developer Intern at W.E Bridge Technologies, Phnom Penh

JUNE 2018 – DECEMBER 2018

- Developed features for HenkelCRM and iBrain Teacher applications using Objective-C.
- Created and tested an HR application, contributing to streamlined human resource processes.
